# STRATASITE™

ACTIVE THREAT PLANNING

3 Steps to Jump-Start Your Active Threat Planning Project

STEP 1 — Identify Your Buildings/Areas

Identify which buildings or event areas may need active threat plans.

- Consider needs for after-school events including stadiums, parking lots, and other open-air spaces
- Assess if you also need interior School Safety Maps (annotated floor plans, a.k.a. "Critical Incident Mapping")

STEP 2 — Identify Your Stakeholders

Successful ATP often starts with simple collaboration between planners and responders across agencies and organizations.

StrataSite will help coordinate and host an online session so your stakeholders can learn how collaborative active threat planning can increase efficiency and save lives.

Attendees could include the following:

- Law Enforcement
- Safety Directors
- EMS
- Fire
- School Admin
- SROs

STEP 3 — Contact StrataSite

Request a project quote on **stratasite.io**. A StrataSite representative will follow up to review and discuss next steps.
